

	Chloe	Jack
Make a list of all the functional requirements in the design	logs in creates account advice light mode dark mode has advice cant access premium no accessibility features cant book training see main screen	done
Can you see where in the code each functional requirement is met?	needs more comments	done
Make a list of all the non-functional requirements in the design	runs readable takes ages to sign up and run everytime doesnt save login info	done
Can you see where in the code each non-functional requirement is met?	needs more comments	done maybe add bigger text for accessibility
Can you see accessibility requirements being met in the code?	no	done dark and light
Can you see legal requiriements being met in the code?	tickbox policy	terms and conditionds met
Are you able to run the code and see all the main requirements being met?	when run yes	done all there
What additional comments should be made in the code to make it easier to understand?	explain the requirements not what the code is doing	done
Are there any changes to the structure of the code that would make it easier to understand?	comments	put it in a text document SQL DDL or DML
What other comments would you add about the usability of the code from a user's perspective?	create process unnecesarily long	done
